

REMARKS

Applicant requests that the prior art references set forth in the respective Supplemental Information Disclosure Statements of March 15, 2007, August 31, 2007, October 16, 2007, December 6, 2007 and January 30, 2008 be reviewed and made of record.

Applicant submits that the newly drafted claims are within the scope of the original invention and that support for the terminology and claim elements can be found as follows:

Claim 33

The addition of the feature “graphics data...”: Page 56, Lines 10-17; Page 68, Line 16 to Page 69, Line 3; Figure 38, steps S43 and S66.

The addition of the feature “the decoded graphics data in a graphics plane is rendered on time indicated by a presentation time stamp in the control packet”: Page 66, Lines 14-25; Figure 36, steps S43 and S51.

The addition of the feature “the graphics plane is cleared on time indicated by a decode time stamp in the control packet”: Page 66, Lines 5-13, Figure 36, steps S41, S47.

Claim 34

The addition of the “acquire unit”: Page 54, Lines 6-24.

The addition of the “processor”: Page 56, Lines 10-17; stream graphics processor 14 of Figure 26.

The addition of the processing (i): Page 56, Lines 10-17.

The addition of the processing (ii): Page 68, Line 16 to Page 69, Line 3; Figure 38, steps S43 and S66.

The addition of the “controller”: Page 56, Line 28 to Page 57, Line 2; graphics controller 17 of Figure 3.6.

The addition of the processing (A): Page 66, Lines 14-25; Figure 36, steps S48 and S51.

The addition of the processing (B): Page 66, Lines 5-13; Figure 36, steps S41, S45, S47..

Claim 35

The addition of the feature “graphics data...”: Page 56, Lines 10-17; Page 68, Line 16 to Page 69, Line 3; Figure 38, steps S43 and S66.

The addition of the feature “the decoded graphics data in a graphics plane is rendered on time indicated by a presentation time stamp in the control packet”: Page 66, Lines 14-25; Figure 36, steps S48 and S51.

The addition of the feature “the graphics plane is cleared on time indicated by a decode time stamp in the control packet”: Page 66, Lines 5-13, Figure 36, steps S41, S45, S47.

Claim 36

The addition of the processing “starting decoding...”: Page 56, Lines 10-17.

The addition of the processing “ending...”: Page 68, Line 16 to Page 69, Line 3; Figure 38, steps S43 and S66.

The addition of the processing “rendering...”: Page 66; Lines 14-25; Figure 36, steps S48 and S51.

The addition of the processing “clearing...”: Page 66, Lines 5-13, Figure 36, steps. S41, S45, S47.

Claim 37

The addition of the recording apparatus of claim 33: Page 125, Line 22 to Page 127, Line 3.

This section of the Description recites an authoring apparatus that generates a BD-ROM application format, and apparatuses that create a master BD-ROM and perform pressing and

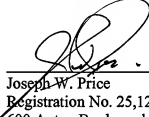

laminating. This authoring apparatus and apparatuses that create a master BD-ROM and perform pressing and laminating are the specific grounds for the addition of the "recording apparatus." The video stream and the graphics stream in this claim are the same as those recited in Claim 29, and, therefore, the grounds for amendment are the same as for Claim 29.

It is believed these newly drafted claims more than adequately distinguish over the known references of record, and early notification of allowance is requested.

If the Examiner believes a telephone interview will help further the prosecution of the case, the undersigned attorney can be contacted at the listed phone number.

Very truly yours,

SNELL & WILMER L.L.P.
